

- > Run through the maze avoiding the numbers!
- Throw the little numbers in your backpacks and <u>Keep Going!</u>
- The Number Maze game map contains numbers (1-9).
 - The blue number is the user.
 - The other numbers are played by the computer.
- When the human player meets a number at the same square,
 - if human number is less than the computer number, Human player dies and <u>Game Over!</u>
 - Otherwise, human player collects the number.

- Collected numbers are put in the backpack.
- When numbers at the backpacks are the same, at the same backpack level, they are matched.
- Each matching operation turn into score and adds 1 to the human number.
